## ETHNOBOTANY

We are pleased to present our first list dedicated to books in the general area of Ethnobotany. The study of useful plants is an ancient discipline, but the term ethnobotany to indicate a separate and distinct branch of the natural sciences did not come into use until 1895. It is, by definition, interdisciplinary, drawing from botany, medicine, anthropology, religion, history, pharmacology, phytochemistry and conservation and the books we offer reflect this wide range of disciplines. Although simply listed alphabetically by author, there are many books related to the use of plants in Africa, Hawaii and the Pacific, Asia and the Americas, and others describing the use of psychoactive plants in ancient religions and modern times.

24. Heim, Roger with R. Gordon Wasson. **LES CHAMPIGNONS HALLUCINOGENES DU MEXIQUE:** Etudes Ethnologiques, Taxinomiques, Biologiques, Physiologiques et Chimiques; and **NOUVELLES INVESTIGATIONS SUR LES CHAMPIGNONS HALLUCINOGENES** in ARCHIVES DU MUSEUM NATIONAL D'HISTOIRE NATURELLE. TOME VI and TOME IX. Septieme Serie (2 volumes) together with LIFE MAGAZINE, May 17, 1957. Paris: Editions du Museum National d'Historie Naturelle 1958, 1965-66. First editions. A landmark study of the hallucinogenic mushrooms of Mexico and their ritual use by noted curandera, Maria Sabina. Profusely illustrated with color photographs of mushroom ceremonies with many additional photographs, illustrations, maps, and diagrams. A comprehensive, scholarly, and beautifully produced work. (The text is in French. This work has not been translated into any other language.) R. Gordon Wasson was an international banker, amateur mycologist, and author, who married Valentina Pavlovna Guercken, a pediatrician, in 1926. On a delayed honeymoon in 1927 in the Catskill Mountains of New York, the Wassons' lifelong gathering of "references to mushrooms and toadstools in the folklore of the world" began. The Wassons went on to integrate

mycological data with data from other fields: history, linguistics, comparative religion, mythology, art, and archaeology, exploring all aspects of mushrooms. Their investigations led to expeditions in Mexico beginning in 1953 to research the magico-religious use of mushrooms. In 1955, they became the first outsiders to participate the Mazatec Indians' sacred mushroom rituals. The May 17, 1957 issue of Life Magazine ( pp 100-109 including photographs and Heim's drawings of the species of mushrooms previously unknown to scientists) contains Wasson's account of his first experience with these hallucogenic mushrooms, when he was accompanied by photographer Allan Richardson, as well as by his wife (in this article the curandera is Eva Mendez). Later expeditions included Roger Heim, noted mycologist and head of the Museum National d'Histoire Naturelle. Folios. Tome VI: 322 pp plus 36 color and black and white plates; Tome IX: Frontispiece, pp 112-218 plus appendix and 11 plates. Text illustrations in color and black and white. Maps and charts. Both volumes very near fine in stiff beige wrappers with black titles and decorations (partially unopened.) Magazine is in very good condition (staples loose). Priced as a 3 item set. 38712 \$450.00

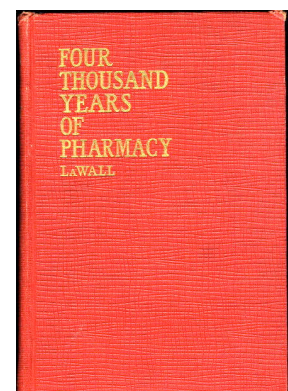

25. Henkel, Alice. **WEEDS USED IN MEDICINE**: U.S. Department of Agriculture Farmers' Bulletin No. 188. Washington, D.C.: Government Printing Office, 1904. First edition - a slim pamphlet. Instructions for the farmer on how to turn weeds to good account, instead of just exterminating them. Discusses how and when to gather and prepare them - whether they are roots, barks, leaves and herbs. Among the plants are burdock, dandelion, the docks, couch grass, pokeweed, foxglove, mullein, lobelia, tansy, gum plant, scaly grindelia, boneset, catnip, hoarhound, yarrow, fleabane, blessed thistle, jimson weed, poison hemlock, wormseed, and mustards. 26. Kaigh, Frederick (pseudonym of Gerald Baeyertz Kirkland). Foreword by Montague Summers. **WITCHCRAFT AND MAGIC OF AFRICA**. London: Richard Lesley & Co., (1947.) First edition. A rather strange book, one which takes as its premise that modern science cannot explain everything about African witchcraft - perhaps this can be explained partly by the fact that Dr Kirkland wrote this hoping to stave off bankruptcy, so a certain amount of sensationalism would help sales. Illustrated with photographs, foreword by Montague Summers. xxv, 159 pp. Very good in brown cloth (bookplate of John M. Blauer on front pastedown), lacking the dust jacket. 54770 \$25.00

27. Kalweit, Holger **SHAMANS, HEALERS AND MEDICINE MEN**. Boston: Shambhala, 2000. Trade paperback. Primal healing methods of shamans all over the world. Translated from the German by Michael H.
